

PEARL SpO₂

High quality probes for
Medlab Pulse Oximeters

Medlab PEARL SpO₂ probes can be used with all currently sold Medlab pulse oximeters. They are the result of more than 15 years of experience in developing SpO₂ sensors. By using only the highest quality cabling, a Kevlar re-enforcement and a specially designed cable strain relief, we are able to offer all reusable probes with a two year warranty.

The standard cable length of the sensors is 95cm, extension cables are optionally available.

Please see the table on the right side for more information. We deliver a full line of probes for different applications.

By using the PEARL probes, your budget for pulse oxymetry is easy to plan: you can be sure that for 24 months, there will be no additional costs because of broken probes*.
